Abstract

10

The invention relates to a strip of nails for use in a mechanical drive-in-device with a discharge channel. The strip of nails comprises nails with nailheads and a guiding strip, which guides the nail shank in the center-  
15 line of the discharge channel. The guiding strip consists of multiple jointed guiding links (3, 23, 33, 34), which are arranged relocatably on the nail shank (2, 22, 32, 42) of each nail and which are adapted to the cross section of the discharge channel (9) guiding the nailheads (1, 21, 31, 41).
